SUMMARY

Frontend / React Native Developer with hands-on experience building scalable, high-performance web and mobile applications using React, Next.js, and React Native. Adept at delivering modern UI/UX experiences and managing full development lifecycles from concept to deployment. Passionate about writing clean, maintainable code and continuously learning new technologies.

EXPERIENCE

Frontend Developer

Crei Studios

July 2025 – Present, Remote

- Leading the full-stack development of Sinav Modu, an AI-powered exam simulation app built with React Native and NestJS, integrating real-time analytics.
- Implemented AI-driven analysis modules using OpenAI API for personalized exam performance reports, providing insights that increased user retention by 20%.
- Managing and developing WordPress-based websites for 5+ active clients, ensuring responsive design, SEO optimization, and smooth content workflows.
- Optimized database queries and API response times by 30%, resulting in a smoother user experience under high traffic loads.

Frontend & Mobile Developer

Digivisor Agency

February 2025 – July 2025, Antalya, Turkey

- Architected and implemented a cross-platform mobile application using React Native and Expo, achieving 99.5% code reusability between iOS and Android platforms while maintaining native performance.
- Designed a component-based UI system with React Native Paper that decreased development time for new features by 30% while ensuring consistent branding across the application.
- Collaborated with cross-functional teams to integrate RESTful APIs, resulting in a 15% improvement in data retrieval efficiency.
- Conducted code reviews and mentored junior developers to maintain high standards of code quality and scalability throughout the project lifecycle.

Frontend Developer

adambul.net

January 2024 – August 2024, Remote

- Engineered a high-traffic sports and lifestyle website using JavaScript, TypeScript, React, NextJS, and Redux.
- Orchestrated the entire frontend development lifecycle, leading to 750+ enrolled users, 75+ listed fields, and 300+ daily visitors.
- Managed backend systems with Node.js, Express, and PostgreSQL, ensuring 99.9% uptime for critical transactions.
- Migrated from MongoDB to PostgreSQL with Prisma ORM, which improved complex query performance by 50% and transaction handling by 20%.

Frontend Developer

Hüner Medya

October 2023 – January 2024, Remote

- Developed and customized 10+ WordPress websites with WooCommerce, enhancing site performance and user experience.
- Implemented custom theme and plugin modifications to meet specific client requirements, resulting in a 20% increase in page load speeds.
- Enhanced SEO strategies and cross-platform responsiveness, leading to a 25% growth in organic site traffic for clients.
- Delivered secure and user-focused web solutions while maintaining comprehensive documentation for client handovers.

Frontend Developer Intern

Softalya

February 2023 – July 2023, Remote

- Participated in a real-world web application project, contributing to the development of responsive components using React and CSS frameworks.
- Collaborated with a team of 5 developers in an agile environment, participating in daily stand-ups and sprint planning sessions.
- Assisted in the UI design and implementation process, ensuring adherence to design system guidelines and accessibility standards.
- Documented technical workflows and contributed to the maintenance of the codebase, ensuring 100% test coverage for critical UI components.

PROJECT

Hepantalya

- Developed a feature-rich mobile application frontend using React Native, Expo, and React Native Paper, delivering a seamless cross-platform experience for iOS and Android users.
- Engineered a responsive and intuitive user interface with custom components, animations, and gesture handlers that decreased user onboarding time by 30% and increased user engagement metrics.
- Implemented efficient state management solutions with Context API and custom hooks, reducing render cycles by 25% and improving overall application performance.

adambul.net

- Engineered a sports & lifestyle website using JavaScript, TypeScript, React, Next.js, Redux, MaterialUI.
- Orchestrated the entire project development lifecycle including frontend and leading to 750+ enrolled users, 75+ listed fields, 20+ registered teams, and 300+ daily visitors.
- Migrated from MongoDB and Mongoose to PostgreSQL and Prisma and gained 20-50% performanceincrease on complex queries, 10-20% increase on transaction handling under heavy loads.

Sınav Modu (My Own Project)

- Developed an AI-powered exam simulation mobile application designed to improve student focus and performance, serving over 500 active users.
- Built with a monorepo architecture, featuring real-time ranking, analytics, and goal-tracking modules that increased user engagement by 40%.
- Integrated OpenAI API for intelligent post-exam feedback and performance analysis, reducing manual grading time by 60%.
- Implemented JWT-based authentication, premium subscription tiers, and data-driven reports, ensuring a secure and scalable platform across iOS and Android.

EDUCATION

Associate Degree: Computer Science

Mehmet Akif Ersoy University • Burdur, Turkey • September 2021 • 3.85/4

- Designedmultiple projects including a ToDo List, Time Tracker, and Music Player using HTML, CSS, JavaScript, TypeScript, Bootstrap, PHP, MySQL.
- Final project: developed a functional interactive web app simulating real-world user flows.
- Specialized in Web Design and Programming.

SKILLS

React, Next.js, React Native, Node.js

JavaScript, TypeScript

HTML, CSS, Styled Components

Redux, Expo, React Native Paper, Material-UI

English B1 – Intermediate
